Contents of Volume 23

No. 1

Announcement from the Publisher v

Review

V.I. Krinichnyi (U.S.S.R.)
Investigation of biological systems by high resolution 2-mm wave band ESR 1

Research Articles

M. Szögyi, T. Cserháti and L. Lelkes (Hungary)
Differential scanning calorimetry to study the possible ternary complex formation between chlorhexidine, phosphatidylcholine and some nonionic tenzides 31

A. Vázquez, J. Tudela, R. Varón and F. García-Cánovas (Spain)
Determination of hemoglobin through its peroxidase activity on chlorpromazine 45

G. Fasan, M. Grandgeorge, C. Vigneron and E. Dellacherie (France)
Preparation of unaltered hemoglobin from human placentas for possible use in blood substitutes 53

P. Palacios, P. Bussat and D. Bichon (Switzerland)
Novel solid-phase synthesis of thiol-terminated-poly(α-amino acid)-drug conjugate 67

M. Bonde, H. Frøkier and D.S. Pepper (Denmark, U.K.)
Selection of monoclonal antibodies for immunoaffinity chromatography: model studies with antibodies against soy bean trypsin inhibitor 73

R.S. King and P.R. Panfili (U.S.A.)
Influence of fragment size on DNA quantitation using DNA-binding proteins and a sensor-based analytical system: applications in the testing of biological products 83

Announcements 95

No. 2

Mini Review

P. Gebauer, J. Caslavska and W. Thormann (Switzerland)
Innovative developments in isotachophoresis (displacement electrophoresis) 97

Research Articles

J.L. Hopkins, R. Betageri, K.A. Cohen, M.J. Emmanuel, C.R. Joseph, P.M. Bax, P.V. Pallai and M.T. Skoog (U.S.A.)
Rhinovirus 3C protease catalyzes efficient cleavage of a fluorescein-labeled peptide affording a rapid and robust assay 107

M. Chiari, L. Pagani and P.G. Righetti (Italy)
Physico-chemical properties of amphoteric, isoelectric, macroreticulate buffers 115

J.E. Royland, R.C. Wiggins and G. Konat (U.S.A.)
Turbidity as a measure of particulate subcellular fraction yield 131

J. Kvannes and T. Flatmark (Norway)
A fluorometric assay of acyl-CoA oxidase activity by a coupled peroxidatic reaction: elimination of interfering side reactions 135

D.J. Cash, K. Subbarao, J.R. Bradbury and G.M. Mayes (U.S.A.)
Filter assay technique and quench-flow experiments: examples of receptor-mediated transmembrane ion-exchange measured with membrane vesicles 151

L. Zhaoqian, C. Changhai and Z. Youmin (China)
Studies of the effect on tumor and normal cells in vitro with bioactive materials isolated from algae by a microcalorimetric method 163

H. Ishida, Y. Kido, T. Tsujinaka, Y. Hayashida, A. Ogawa, S. Iijima, T. Homma, M. Yokota, M. Sakaue, T. Kurahori and T. Mori (Japan)
Evaluation of the reticuloendothelial system function by the vascular clearance of chondroitin sulfate iron colloid 169

H. Böttcher, J. Nittinger, S. Engel and P. Fürst (F.R.G.)
Thermogenesis of white adipocytes: a novel method allowing long-term microcalorimetric investigations 181

Short Note
A. Liras (Spain)
A simple and rapid experimental protocol for studies of nucleic acids metabolism and their base composition 189

No. 3

Research Articles
C. Avignolo, R. Roner, S. Cai and F.A. Bignone (Italy)
Biotinylation of denatured double-stranded DNA after transamination of cytidines: molecular biology applications 193

Y. Aoki, C. Tohyama and K.T. Suzuki (Japan)
A Western blotting procedure for detection of metallothionein 207

J.F. Takrama and K.E. Taylor (Canada)
A continuous spectrophotometric method for monitoring phospholipase D-catalyzed reactions of physiological substrates 217

O. Vesterberg (Sweden)
Automatic method for quantitation of mercury in blood, plasma and urine 227

M.-C. Ruiz, F. Michelangeli, J.E. Ludert, F. Liprandi, J.R. del Castillo, M.E. Chemello, G. Benaim and E. Cohen (Venezuela)
Fluorimetric quantification of cell death in monolayer cultures and cell suspensions 237

I. Šafařík (Czechoslovakia)
A spectrophotometric assay for lipase activity utilizing immobilized triacylglycerols 249

Short Communications
M. Bastos, S. Hägg, P. Lönnbro and I. Wadsö (Sweden)
Fast titration experiments using heat conduction microcalorimeters 255

R.C. YashRoy (Canada)
^{13}C-NMR studies of membrane lipid-protein interactions upon protein heat denaturation 259

Announcements 263

No. 4

Research Articles
W.L. Baker and A. Panow (Australia)
Estimation of cellulase activity using a glucose-oxidase-Cu(II) reducing assay for glucose 265

A. Radu (Romania)
A simple polymerase chain reaction apparatus based on a computer printer 275

P. Bäckman and I. Wadsö (Sweden)
Cell growth experiments using a microcalorimetric vessel equipped with oxygen and pH electrodes 283

C.G. Kolvenbach, K.E. Langley, T.W. Strickland, W.C. Kenney and T. Arakawa (U.S.A.)
Densimetric determination of carbohydrate content in glycoproteins 295

I. Šafařík and M. Šafaříková (Czechoslavakia)
Black substrate for spectrophotometric determination of cellulase activity in coloured solutions 301

A. Shisheva, O. Leitner and Y. Shechter (Israel)
A novel approach for evaluating tyrosine kinase activity based on the radioimmunological determination of phosphotyrosine 307

L. Holmquist and O. Vesterberg (Sweden)
Quantification of apolipoprotein D in human urine by zone immunoelectrophoresis assay: a methodological and clinical study 315
